technology factory outlet

Control Your Colours
APP Controlled Smart Lighting

1 Get the App

Download "Tikteck LED Light" from the App Store or Google play.

Tikteck LED Light

App Store

Google play

3 Control

Choose any color from the palette to change your bulbs color, and adjust brightness and color temperature below the palette. Slide left to enter into device management (#5), and click the setting icon in the top right corner to access the settings menu.

2 Connect Bulb

Screw in your Tikteck bulb and turn it on. Open the "Tikteck LED light" app on your smart device and turn on bluetooth if prompted, then select "add device" to connect.

4 Timer

Timer setting can be saved to a specific bulb, which will work with multiple bulbs even if bluetooth is not connected. Please do not cut the power off.
5 Device Management

You can add, rename, or group bulbs in this interface.

⑥ Share Your Configuration

To make it easier for your family to enjoy smart lighting, we developed a sharing system. After adding smart bulbs, you can share your configuration with others via WIFI.

How to share:

1. Make sure both devices are in the same WIFI network.

2. Go to Authorization on each device.

3. On the device with the configuration you would like to share, click "Share my configuration" (allow camera use if requested), and scan another device's QR code to share.

⑦ Lab

Go to Settings, and select Lab.

There are several cool functions available in the Lab: Music, Game, Night Light, Colorful, Repellent, and more coming soon.

⑧ Upgrade

By upgrading to the latest version, you can fully enjoy your light. Please keep your device close (<50cm) to your bulb when upgrading, and use the visual signals to tell which bulb is nearby (the closer to 0 the stronger the signal). Please restart the app after completing the upgrade.

⑨ Restore the factory setting

If you found that you can't add, connect, or group your smart bulbs, restore the factory settings by following these steps:

1. Select the bulb you want to restore and go to the restore page.

2. Turn on the bulbs which you want to restore.

3. Select "Restore." Once the bulb is finished restoring, it will flash several times and then reset to white.

❗ Device Requirement

1. Android 4.3 / iOS 6 or above.

2. Support Bluetooth 4.0 or above.

💡 Specifications

Power: 7.5W
Socket: E26
Lumen: 600lm
CRI: >80
Input Voltage: 100-240V
Color Temp.: 2700K~6500K
RGB Color: 16M RGB colors
Size: A60
Life Time: 25000 hours

⚠ Warnings

Not suitable for outdoor locations due to rain.

Keep away from all moisture and water.

Keep away from explosives.

Do NOT handle the bulb directly after continued use due to heat.

Do NOT disassemble, soak, or remould bulbs.

Carefully screw the bulb in to avoid improper connection or accidents.

Please turn off power before cleaning, removing or inserting bulbs.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
